

Lesson 2.3. Prime Vendor (PV) Requisitions

Introduction. In this lesson, you will learn how to process Prime Vendor (PV) types of requisitions for medical supplies.

Objectives.

- 2.3.1. Process PV, JIT, usage, and non-usage requisitions in AIS.

Topic: Processing PV & Backup PV LOG Orders

Process routine PV requirements through the DMLSS log orders process.

- When an order is placed with a primary PV and is canceled due to the item being out of stock, backordered, discontinued, etc. the order may be ordered through a backup PV.

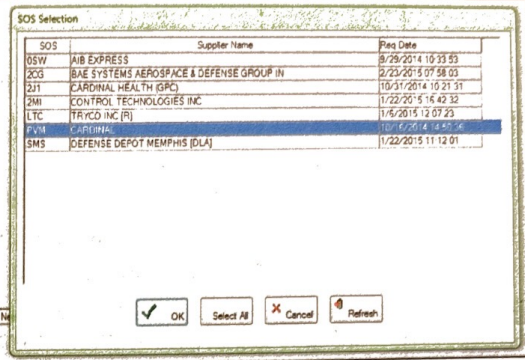

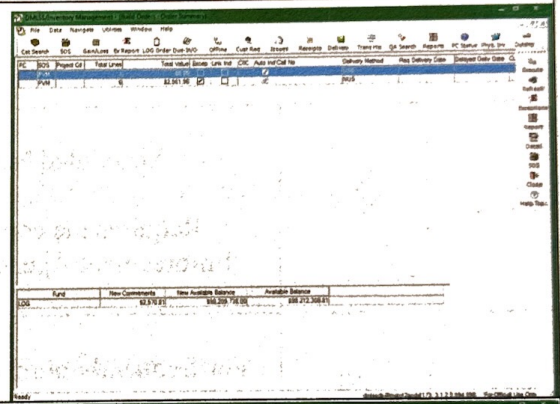

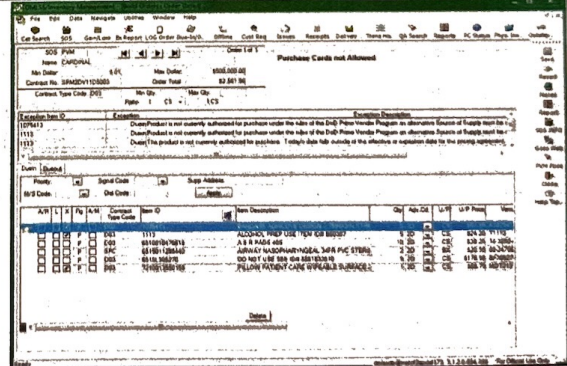

It is critical to understand that the Prime Vendor (PV) is a program, not an application. It is a contracting strategy managed by DLA to create a fast and reliable supply channel. You access the PV program through DMLSS.

- Purpose: The purpose of the prime vendor (PV) is to shorten the logistics pipeline and make it more reliable.
- There are two main product categories within the PV program
 - Medical/surgical (PVM) supplies
 - Examples: Owens and Minor, Cardinal Health
 - Pharmaceutical (PVP) supplies
 - Examples: AmerisourceBergen
- PV Order Types: The PV program uses specific order types within DMLSS to manage delivery urgency and supply. The table below shows the types of PV orders, and their data entry code (assigned in DMLSS):

Type of Order	Delivery Method	Description	Applicable SOS
Just in Time	JIT	Guaranteed pharmaceutical delivery within 24 hours.	PVP
Drop Shipments	DRS	Item(s) ordered through PV but delivered to customer directly from manufacturer.	PVP/PVM
Emergency Order	N/A	Guarantees delivery within a 6-hour timeframe via the fastest possible carrier. Maximum of 2 free shipments/month; if more are required additional fees may be charged to the customer including all applicable transportation and handling costs.	PVP/PVM
Controlled	N/A	Scheduled Narcotics ONLY Requires the completion of a Drug Enforcement Agency (DEA) Form 222.	PVP
Usage	USE	For frequently purchased items based on a facility's established monthly usage.	PVM
Non – Usage	NUS	For infrequently purchased items. Default for new items.	PVM

Lesson Activity

Follow your instructor's directions to practice processing PV requisitions in DMLSS.

Processing a PV LOG Order	
1.	At the Navigate menu, point to Orders, and then click LOG Orders.
2.	In the SOS Selection window, select the SOS(s) for the order(s) you want to execute. Prime Vendor orders with PV. 
3.	Click OK
