

Unit 4. Follow-Ups

Lessons. This unit contains the following lessons:

- 4.1. Follow Up Procedures

Lesson 4.1. Follow-Up Procedures

Objectives.

- 4.1.1. Process follow up actions.

Topic: Follow-Up Procedures

When managing requisitions, you'll find that while some orders receive automatic status updates directly in the DMLSS Due-in detail, others require manual intervention. For example, follow-up for GPC orders is a manual process because they are not electronically transmitted from DMLSS to the vendor. This requires you to personally contact the vendor for updates and then manually enter status notes into DMLSS, including the order reference number, shipping dates, costs, tracking number, and a point of contact. Additionally, all documentation for the purchase must be retrieved, retained, and filed for audits and inspections.

As you track these incoming orders and update their status in the system, DMLSS uses specific records to maintain accountability for all materiel. Understanding these records is fundamental to managing your inventory. The two most basic statuses you will work with are "Due-Ins" for incoming supplies and "Due-Outs" for outgoing obligations.

Due-In

A "Due-In" is a record of materiel that is expected to be received in the Warehouse. When an MTF requisitions supplies, a due-in is established in DMLSS. This record remains active until the materiel is physically received and processed into the inventory. Think of it as an "on order" status for incoming supplies.

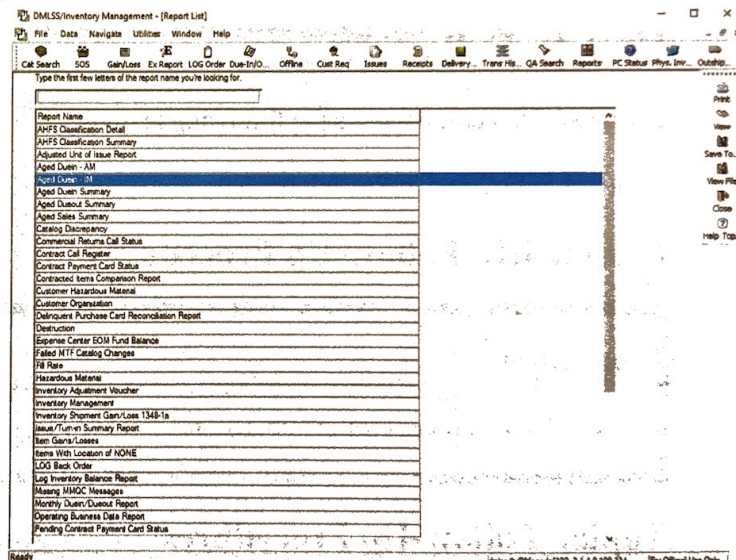

Due-Out

A "Due-Out" is a record of an obligation to issue materiel to our customers. When a customer (another section, a different base, a deploying unit, etc.) requests an item, a due-out is created. This indicates that the supply activity (MedLog) has a commitment to provide that item. The due-out is cleared once the materiel is issued to the customer.

Topic: DMLSS Reports/Documentation

Standard Reports: DMLSS Standard Reports are pre-built "snapshots" of your data. They are designed to show you specific information in a fixed format that you cannot change. You simply select the report you need and the system generates it for you. You don't build the report, you just run it to see the data.

Select Reports on the horizontal toolbar or select Reports on the Navigation toolbar to run a standard report in Inventory Management. In the Report List window, a listing of all standard reports can be viewed, printed, and saved.

Aged Duein – IM:

Provides detailed information on requisitions for IM that are overdue according to the procurement lead time for a given item.

Lesson Activity

Follow your instructor's directions to run an AGED DUEIN REPORT – IM

Standard Reports	
Step	Action
1.	From the Navigate window go to Inventory Management
2.	Click Reports on the top toolbar 
3.	Select Aged Duein - IM
4.	The Report Selection Criteria window will appear. Highlight your assigned SOS 

5. Double click or click the "RIGHT ARROW →" so your assigned SOS will reflect in the "Selected SOS" box

Specify Report Selection Criteria: Aged Due-In - RM

Topic: DMLSS Due-In Notes

Keeping good notes on your follow-ups is a must. It's how you keep your customers informed, and it's required for every order, regardless of the supplier. The best practice is to record all updates in the DMLSS Due-in Notes. Write your notes so they are clear and simple. Think of it this way: if you were out of the office, could a teammate read your note, understand the order's status instantly, and take over without any confusion? That's the level of clarity you should aim for.

Practical Exercise

Instructions. Follow the directions from your instructor to complete a practical exercise.

Lesson Activity

Follow your instructor's directions to document DMLSS Due-In Notes.

Aged Due-in Follow-up Actions	
Step	Action
1.	From the Navigate window go to Inventory Management
2.	Click Due-In/Out on the top toolbar 
3.	Choose an Item ID from your Aged Duein Report
4.	Type the Item ID into the correct field on the Duein Search Tab
5.	Click Search or press Enter
6.	On the vertical toolbar click Notes 
7.	Enter the following information into the notes: <i>Your Rank and Name</i> <i>Current Date</i> <i>POC:</i> <i>Order Reference Number:</i> <i>Order Tracking Number:</i> <i>Estimated Delivery Date:</i> <i>Note:</i>
8.	Click Print. For practice purposes, do not save!!

Lesson Review

Quick Check:

	Question	Answer	Page #
1.	What information should be entered into the notes section in DMLSS?		
2.	What is a due-in and due out?
