

Unit 5. Document and Quality Control (QC)

Lessons. This unit contains the following lessons:

- 5.1. Document Identification
- 5.2. Quality Control
- 5.3. Storage Requirements

Lesson 5.1. Document Identification

Objectives.

- 5.1.1. Identify auditable sources and supporting documentation.

Topic: Auditable Sources

In Medical Logistics, an "auditable source" is any official location, system, or file where significant duty documents are stored for the purpose of an audit. These spots are where an auditor begins their work, as they contain the official evidence needed to verify all financial transactions. Knowing what these sources are and keeping them organized is the key to a successful audit. Every transaction must have a clear paper or electronic trail that shows the history of a supply or equipment item.

Below are examples of primary auditable sources you may use every day depending on your duties:

Auditable Source	Type	What an Auditor Finds Here
DMLSS System	Electronic	This is your #1 source for <i>live</i> data. It contains the real-time status of orders, inventory levels, customer requests, and equipment records
Shared Drive	Electronic	This is the primary auditable source for completed electronic records. Rather than keeping physical documents, master PDF files are saved electronically and considered an official record
GPC Bank Website	Electronic	The official source for monthly statements for GPC transactions. This is where cardholders upload documentation to justify each purchase
Controlled Items Vault/Cage	Physical	A critical physical source due to safeguarded controlled items. It contains the hard-copy inventory logs, access rosters, and issue forms for all controlled substances

Topic: Supporting Document

A supporting document is the official proof or evidence of a transaction that records every step in the life of a supply or equipment item. These documents are critical because they are the evidence auditors and inspectors use to verify that you are following regulations and managing government resources appropriately. In our modern workflow, this proof has a two-part life that begins as a physical "working copy" that you handle, sign, and stamp. Then ends as a permanent digital record that you file electronically.

An **example** of a complete source document packet of a GPC purchase can be found below:

- DD Form 1155 (Order for Supplies or Services)
 - This is the basic purchase order form used when placing an order.
- DD Form 250 (Material Inspection and Receiving Report)
 - Serves as proof that the supplies were received and that they met the required specifications
- Vendor Invoices/In-Store Receipts
 - Proof of what was ordered and how much it cost
- Packing Slips
 - A list from the vendor of what should be in the shipment and used to verify contents upon receipt
- Delivery List
 - System-generated document to identify the contents of each customer's order for appropriate delivery

Topic: Document Numbers

Supporting documents are assigned document numbers according to specific transactions being processed (*ex. issues, requisitions, destructions*). Its purpose is to identify the document, establish an audit trail, and aid in filing and retrieval. Each document number consists of a 6-position DoD Activity Address Code/Stock Record Account Number (DODAAC/SRAN), a 4-position Julian date, and a 4-position serial number.

DODAAC/SRAN	Julian Date	Serial Number
FM4621	1021	5678

- **DoDAAC/SRAN (6)**
 - Identifies a unit, activity, or organization that has the authority to requisition and/or receive materiel
- **Julian Date (4)**
 - The first number identifies the fiscal year
 - The next 3 numbers identify the continuous count of days from the beginning of the calendar year. 001-365 (regular year) | 001-366 (leap year)

DAY	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	DAY
1	1	32	60	91	121	152	182	213	244	274	305	335	1
2	2	33	61	92	122	153	183	214	245	275	306	336	2
3	3	34	62	93	123	154	184	215	246	276	307	337	3
4	4	35	63	94	124	155	185	216	247	277	308	338	4
5	5	36	64	95	125	156	186	217	248	278	309	339	5
6	6	37	65	96	126	157	187	218	249	279	310	340	6
7	7	38	66	97	127	158	188	219	250	280	311	341	7
8	8	39	67	98	128	159	189	220	251	281	312	342	8
9	9	40	68	99	129	160	190	221	252	282	313	343	9
10	10	41	69	100	130	161	191	222	253	283	314	344	10
11	11	42	70	101	131	162	192	223	254	284	315	345	11
12	12	43	71	102	132	163	193	224	255	285	316	346	12
13	13	44	72	103	133	164	194	225	256	286	317	347	13
14	14	45	73	104	134	165	195	226	257	287	318	348	14
15	15	46	74	105	135	166	196	227	258	288	319	349	15
16	16	47	75	106	136	167	197	228	259	289	320	350	16
17	17	48	76	107	137	168	198	229	260	290	321	351	17
18	18	49	77	108	138	169	199	230	261	291	322	352	18
19	19	50	78	109	139	170	200	231	262	292	323	353	19
20	20	51	79	110	140	171	201	232	263	293	324	354	20
21	21	52	80	111	141	172	202	233	264	294	325	355	21
22	22	53	81	112	142	173	203	234	265	295	326	356	22
23	23	54	82	113	143	174	204	235	266	296	327	357	23
24	24	55	83	114	144	175	205	236	267	297	328	358	24
25	25	56	84	115	145	176	206	237	268	298	329	359	25
26	26	57	85	116	146	177	207	238	269	299	330	360	26
27	27	58	86	117	147	178	208	239	270	300	331	361	27
28	28	59	87	118	148	179	209	240	271	301	332	362	28
29	29		88	119	149	180	210	241	272	302	333	363	29
30	30		89	120	150	181	211	242	273	303	334	364	30
31	31		90		151		212	243		304		365	31

- **Serial Number (4)**
 - Serial Number is assigned from one of the major serial number blocks found in the figure below – *DMLSS Document Number Block*
 - First transaction processed each day is assigned the first serial number from the appropriate block then increased by 1 as more are processed

Transaction Type	Document Block
Receipt Start & End:	0001-2999
Issues Start & End:	3000-6999
Manual Order Start & End:	7000-7499
Excess Start & End:	7500-7999
Gains Losses Start & End:	8000-8499
Repair Part Transactions Start & End:	8500-9400 *NPF
Catalog Start:	8997
Internal Transfers Start:	8998
Inventory Adjustments Start:	8999
Allowance Changes Start & End:	9000-9099 *NPF
Equipment Changes Start & End:	9100-9199
Equipment Transfers Start & End:	9200-9499 *NPF
Equipment Gains Losses Start & End:	9500-9574
Equipment Loans Start & End:	9575-9599 *NPF
Repair Part Transactions Start & End:	8500-9400 *NPF
MM Complaint Start & End:	C001-C199 *NPF
Service Contract Start & End:	D001-D999 *NPF
Fund Start & End:	F001-F999 *NPF

* NPF – Data not passed to Finance

DMLSS Document Number Blocks

Lesson Review

Quick Check.

	Question	Answer	Page #
1.	What is an auditable source?		
2.	Define a supporting document.		
3.	What is a document number?		

Lesson 5.1. Document Identification Close

Objectives.

- 5.1.1. Identify auditable sources and supporting documentation.
