

Lesson 5.2. Quality Control (QC) Program

Objectives.

- 5.2.1. Evaluate quality control processes.

Topic: Quality Control (QC) Process

While Quality Control (QC) is a responsibility for every member of the Medical Logistics team, customer service personnel have a primary and focused QC role for all transaction records. Before any official documents are filed away into permanent auditable sources, they must be formally verified. Quality control should be performed daily and is accomplished by verifying each source document against the Source Document Control Report (SDCR) from DMLSS. The SDCR lists all transactions that have been assigned a document number and have been processed in DMLSS. QC personnel print this report and use it to cross-check each entry against the corresponding official documents to confirm that every record is accurate, accounted for, and ready for filing.

QC personnel follow the steps below to perform QC on Receipt documents:

1. Collect the Stack of Source Documents

- Gather all the physical source documents that were generated throughout the day from the warehouse

MATERIAL INSPECTION AND RECEIVING REPORT				Form Approved OASD No. 1000-0000	
Public reporting burden for this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0180), Washington, DC 20503. PLEASE DO NOT RETURN YOUR COMPLETED FORM TO EITHER OF THESE ADDRESSES SEND THIS FORM IN ACCORDANCE WITH THE INSTRUCTIONS CONTAINED IN THE DPMR, APPENDIX F-401

2. Put the stack of documents in order
 - a. Sort the stapled source documents numerically by document number order, from lowest to highest
3. Print the SDCR
 - a. In DMLSS, print the SDCR for the date range you are QC'ing. The report will automatically be sorted by document number, matching your sorted stack.
 - i. Inventory Management → Reports Module → Source Document Control Report

Source Document Control Report

4. Cross-Check the Document Number
 - a. Look at the very first document number on the SDCR and pull the matching paper packet from your sorted stack
5. Validity Check
 - a. Before comparing details, first ensure your packet is complete. A valid packet for a receipt must at least contain a DD Form 250 (*Material Inspection and Receiving Report*) and a packing list/invoice from the vendor
6. Compare Key Information
 - a. With the SDCR and the completed packet in your hand, you will now compare key data points to ensure they match perfectly
 - b. At a minimum, the following must be verified against the receipt documents:
 - i. Document Number
 - ii. Item ID
 - iii. Qty
7. Finalize the Verified Packet
 - a. Once the stack of source documents has passed steps 5 and 6, it is considered verified! You must now give it the official seal of approval before it can be filed
 - b. If a source document did not pass, it will be held in "suspense" until corrective actions are completed

QUALITY CHECKED

BY: _____

DATE: _____

Lesson Review

Quick Check.

	Question	Answer	Page #
1.	Which duty section primarily manages QC?		
2.	How often should QC be performed?		
3.	What receipt criteria should be verified against the SDCR?		

Lesson 5.2. Quality Control (QC) Program Close

Objectives.

- 5.2.1. Evaluate quality control processes.
