

Unit 3. Sources of Supply (SOS) Record

Lessons. This unit contains the following lesson:

- 3.1. SOS Records

Lesson 3.1. SOS Records

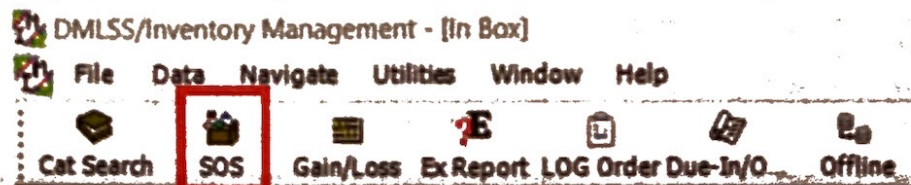

Introduction. This lesson provides an overview on SOS records.

Objectives.

- 3.1.1. Identify SOS type codes.
- 3.1.2. Revise SOS records in AIS.

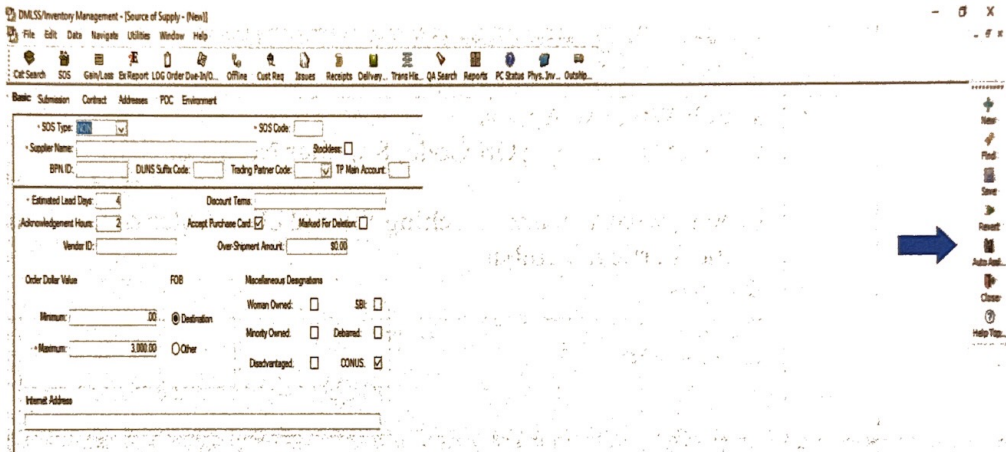

Topic: SOS Type Codes

An SOS record must be created for every vendor and associated with the respective MTF/LOG catalog record(s) prior to processing orders through the system for each vendor. Users should search for existing SOS catalog records prior to adding new records to avoid duplicating records. Once the SOS catalog record is established, each item being purchased from that vendor must be linked to the SOS. If the new source is an official DoD contracting office and the SOS Type Code is equal to CON, then the contracting office's Department of Defense Activity Address Code (DoDAAC) is required. It is important to search for an existing SOS record before creating a new one.

Lesson Activity

Follow your instructor's directions to practice establishing a SOS.

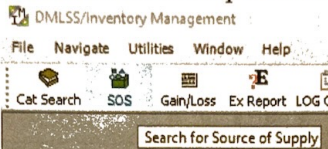

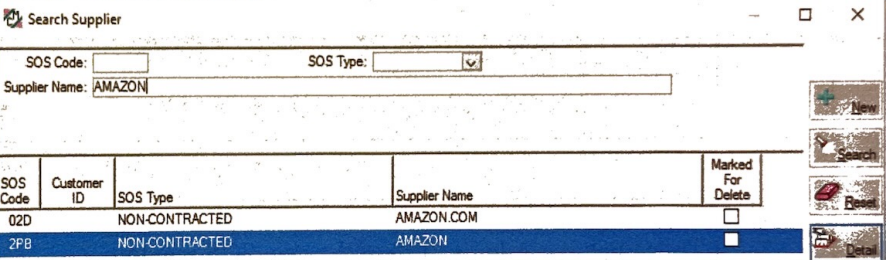

Establishing a New SOS	
Step	Action
1.	From the Navigate Window, click Inventory Management
2.	Click Navigate and go to SOS
3.	Select New SOS
4.	Select SOS Type
	NOTE: You have different types depending on where you are purchasing from, for example, if using a GPC, the SOS type will be NON for Non-Contracted NOTE: You will Select SOS type for any other vendors besides GPC
5.	Click the Auto Assign button on the Vertical Tool bar
	
6.	Then enter the Vendor's name in the Supplier Name window
7.	Then click the Address Tab of the new SOS window
8.	Input the Mandatory fields on the Ordering Address, Click Save
9.	If, POC information is known, click the POC tab and fill out known details.
	Note: The POC information is useful when ordering from a company that has assigned customer service representatives to different accounts.
10.	Click Save

Topic: Revise SOS

It is important to ensure we keep all records up to date and this includes our source of supply records. If any information changes for an SOS, you should promptly update the record. Change can include the vendor's name, address, POC information or even the business website.

Lesson Activity

Follow your instructor's directions to practice revising an SOS.

Revising an Existing SOS																
Step	Action															
1.	From the Navigate window go to Inventory Management															
2.	Click Navigate															
3.	Click SOS on the top toolbar 															
4.	Search Window Appears: You can search by SOS Code, Supplier Name, or SOS Type Type in what you are searching for and click Enter or Click the Search Button on the Vertical Toolbar  <table border="1"> <thead> <tr> <th>SOS Code</th> <th>Customer ID</th> <th>SOS Type</th> <th>Supplier Name</th> <th>Marked For Delete</th> </tr> </thead> <tbody> <tr> <td>02D</td> <td></td> <td>NON-CONTRACTED</td> <td>AMAZON.COM</td> <td>☐</td> </tr> <tr> <td>2PB</td> <td></td> <td>NON-CONTRACTED</td> <td>AMAZON</td> <td>☒</td> </tr> </tbody> </table>	SOS Code	Customer ID	SOS Type	Supplier Name	Marked For Delete	02D		NON-CONTRACTED	AMAZON.COM	☐	2PB		NON-CONTRACTED	AMAZON	☒
SOS Code	Customer ID	SOS Type	Supplier Name	Marked For Delete												
02D		NON-CONTRACTED	AMAZON.COM	☐												
2PB		NON-CONTRACTED	AMAZON	☒												
5.	Highlight and Double Click															
6.	Select the POC tab to adjust information accordingly
